## ■ Installation

### ○ Mounting and Removing from DIN rail

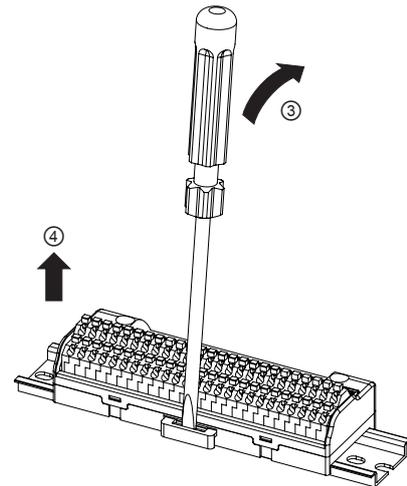

#### ● Mounting

- 1) Pull the rail lock towards direction ①.
- 2) Attach the DIN rail connection part onto the DIN rail.
- 3) Push the unit towards direction ②, then push the rail lock in to lock into position.

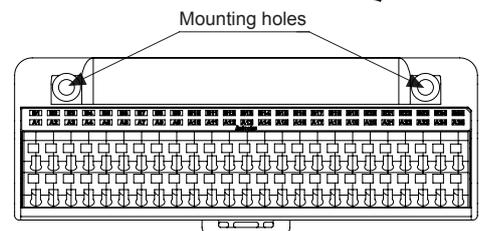

#### ● Removal

- 1) Insert a screwdriver into the rail lock hole and pull it towards direction ③.
- 2) Remove the unit by pulling the unit towards direction ④.

### ○ Mounting with screws

- 1) The unit can be mounted on panels using the mounting holes next to the Hirose connector.
- 2) M4×25mm spring washer screws are recommended for installation. When using flat washers, use Ø8mm diameter washers. The tightening torque should be from 0.7 to 1.0N·m.

#### ● Connection

- 1) Push the end sleeve (ferrule terminal) crimp terminal towards direction ① to complete the connection.

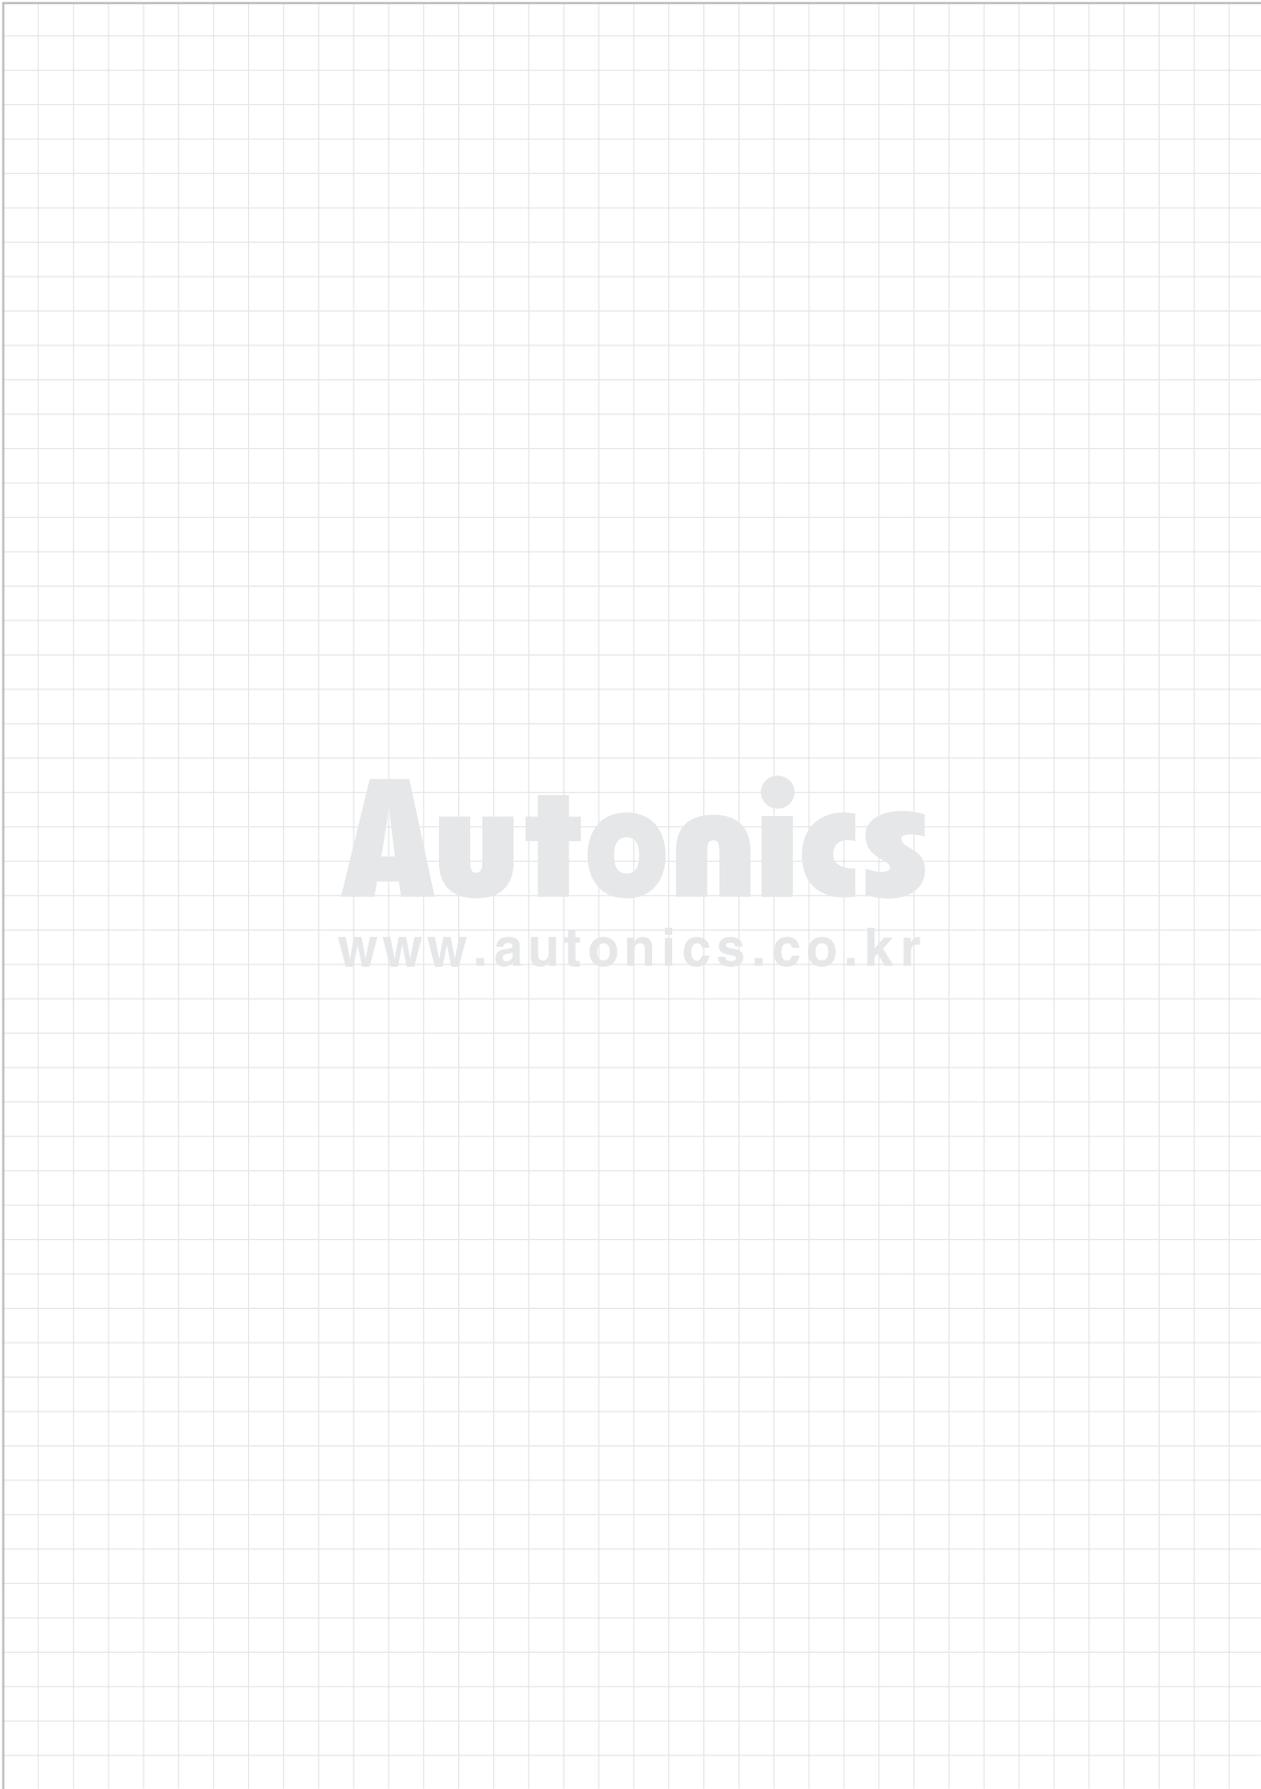

#### ● Removal

- 1) Press and hold the catch above the terminal in direction ② with a flat-head screwdriver.
- 2) Pull and remove the end sleeve (ferrule terminal) crimp terminal towards direction ③.

## ■ Cautions during Use

1. Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
2. Keep away from high voltage lines or power lines to prevent inductive noise.  
In case installing power line and input signal line closely, use line filter or varistor at power line and shielded wire at input signal line. Do not use near the equipment which generates strong magnetic force or high frequency noise.
3. This unit may be used in the following environments.
  - ① Indoors (in the environment condition rated in 'Specifications')
  - ② Altitude max. 2,000m
  - ③ Pollution degree 2
  - ④ Installation category II
