#### DIN W72×H36mm of counter/timer with indication only

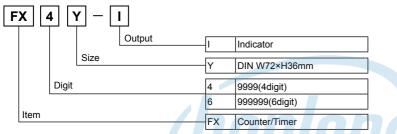

#### Features

- Upgraded counting speed : 1cps/30cps/2kcps/5kcps
- Application of Up/Down input mode
- Selectable Up/Down indication of display value
- Wide range of input power supply : 100-240VAC 50/60Hz, 12-24VAC/DC
- Selectable Counter or Timer function by internal DIP switch selectable time ranges
- Built-in Microprocessor
- Please read "Caution for your safety" in operation manual before using.

○ Using for voltage input(PNP)

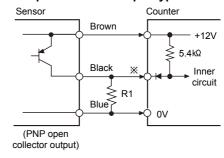

FXY series is for no-voltage input type, it is not available to count applying DC voltage from the external. For using PNP type sensor, please use as the following to count.

#### PNP output type sensor

%Please set R1 value to make the composed resistance of RL + R1 as Max. 470kΩ is an impedance for short-circuit. ※CP1, CP2(INHIBIT), RESET input

• PNP open collector output type sensor

XIn case of PNP open collector output type sensor, please connect lower than 470Ω of R1 to input terminal before using.

#### Counting method

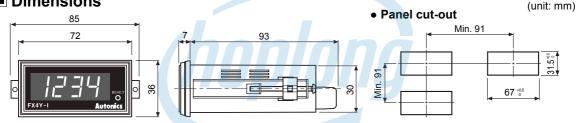

Be careful to select sensor because the counting method of NPN output type sensor is different from PNP output type sensor.

#### NPN output type sensor

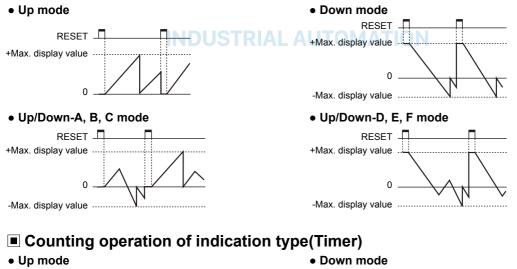

- : When the sensor is changed from OFF to ON, it counts.
- PNP output type sensor
- : When the sensor is changed from ON to OFF, it counts.
